Bangalore, Karnataka, India

Objective

Aspiring cloud engineer with a solid understanding of cloud concepts, open-source technologies and with hands-on project experience. Enthusiastic about learning major cloud platforms, Seeking opportunities to contribute to impactful Cloud projects while continuously improving technical expertise.

Education

Bachelor of Engineering in Computer Science & Engineering	June 2026
R L Jalappa Institute of Technology, Doddaballapura	CGPA 8.6/10

Skills

Programming: Python, HTML, CSS , SQL
Core Computer Science: Computer Network, Operating Systems, ,Cloud(AWS)
Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, Streamlit
Operating Systems: Linux (Proficient), Windows
Version Control: Git, GitHub

Projects

AI & IOT Virtual Try-On System   Aug 2025

Built a platform where users upload a full-body photo and paste an e-commerce product link; the system extracts the clothing image, removes the background, and overlays it on the user photo using AI models like BlazePose, U^2-Net, and VITON for a virtual try-on experience.

Web-info-fetcher   sep 2025

Web Info Fetcher – Created an automated solution in Python to collect, clean, and summarize the latest web content, improving information retrieval speed and accuracy.

Achievement

- Runner-up – National level hackthon (2024)
- Runner-up – EUREKA (2025)
